

SN65LBC174A, SN75LBC174A QUADRUPLE RS-485 DIFFERENTIAL LINE DRIVERS

SLLS446C – OCTOBER 2000 – REVISED MAY 2003

- Designed for TIA/EIA-485, TIA/EIA-422 and ISO 8482 Applications
- Signaling Rates† up to 30 Mbps
- Propagation Delay Times < 11 ns
- Low Standby Power Consumption
1.5 mA Max
- Output ESD Protection Exceeds 13 kV
- Driver Positive- and Negative-Current Limiting
- Power-Up and Power-Down Glitch-Free for Line Insertion Applications
- Thermal Shutdown Protection
- Industry Standard Pin-Out, Compatible With SN75174, MC3487, DS96174, LTC487, and MAX3042

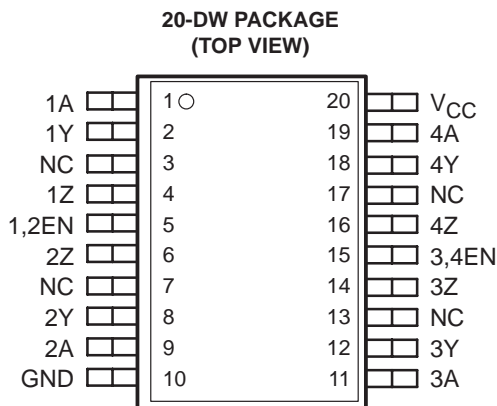

description

The SN65LBC174A and SN75LBC174A are quadruple differential line drivers with 3-state outputs, designed for TIA/EIA-485 (RS-485), TIA/EIA-422 (RS-422), and ISO 8482 applications.

These devices are optimized for balanced multipoint bus transmission at signalling rates up to 30 million bits per second. The transmission media may be printed-circuit board traces, backplanes, or cables. The ultimate rate and distance of data transfer is dependent upon the attenuation characteristics of the media and the noise coupling to the environment.

logic diagram (positive logic)

logic diagram (positive logic)

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

†The signaling rate of a line is the number of voltage transitions that are made per second expressed in the units bps (bits per second).

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

SLLS446C – OCTOBER 2000 – REVISED MAY 2003

description (continued)

Each driver features current limiting and thermal-shutdown circuitry making it suitable for high-speed multipoint applications in noisy environments. These devices are designed using LinBiCMOS™, facilitating low power consumption and robustness.

The two EN inputs provide pair-wise driver enabling, or can be externally tied together to provide enable control of all four drivers with one signal. When disabled or powered off, the driver outputs present a high-impedance to the bus for reduced system loading.

The SN75LBC174A is characterized for operation over the temperature range of 0°C to 70°C. The SN65LBC174A is characterized for operation over the temperature range of –40°C to 85°C.

AVAILABLE OPTIONS

T _A	PACKAGE		
	16-PIN PLASTIC SMALL OUTLINE† (JEDEC MS-013)	20-PIN PLASTIC SMALL OUTLINE† (JEDEC MS-013)	16-PIN PLASTIC THROUGH-HOLE (JEDEC MS-001)
0°C to 70°C	SN75LBC174A16DW	SN75LBC174ADW	SN75LBC174AN
	Marked as 75LBC174A		
–40°C to 85°C	SN65LBC174A16DW	SN65LBC174ADW	SN65LBC174AN
	Marked as 65LBC174A		

† Add R suffix for taped and reeled version.

FUNCTION TABLE (EACH DRIVER)

INPUT	ENABLE	OUTPUTS	
A	G	Y	Z

equivalent input and output schematic diagrams

absolute maximum ratings†

Supply voltage range, V_{CC} (see Note 1)	–0.3 V to 6 V
Voltage range at any bus (DC)	–10 V to 15 V
Voltage range at any bus (transient pulse through 100 Ω , see Figure 8)	–30 V to 30 V
Input voltage range at any A or EN terminal, V_I	–0.5 V to $V_{CC} + 0.5$ V
Electrostatic discharge: Human body model (see Note 2)	Y, Z, and GND 13 kV
	All pins 5 kV
	Charged-device model (see Note 3) All pins 1 kV
Storage temperature range, T_{stg}	–65°C to 150°C
Continuous power dissipation	See Dissipation Rating Table
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	260°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- NOTES:
1. All voltage values, except differential I/O bus voltages, are with respect to GND.
 2. Tested in accordance with JEDEC standard 22, Test Method A114-A.
 3. Tested in accordance with JEDEC standard 22, Test Method C101.

DISSIPATION RATING TABLE

PACKAGE	JEDEC BOARD MODEL	$T_A \leq 25^\circ\text{C}$ POWER RATING	DERATING FACTOR‡ ABOVE $T_A = 25^\circ\text{C}$	$T_A = 70^\circ\text{C}$ POWER RATING	$T_A = 85^\circ\text{C}$ POWER RATING
16-PIN DW	Low K	1200 mW	9.6 mW/°C	769 mW	625 mW
	High K	2240 mW	17.9 mW/°C	1434 mW	1165 mW
20-PIN DW	Low K	1483 mW	11.86 mW/°C	949 mW	771 mW
	High K	2753 mW	22 mW/°C	1762 mW	1432 mW
16-PIN N	Low K	1150 mW	9.2 mW/°C	736 mW	598 mW

SLLS446C – OCTOBER 2000 – REVISED MAY 2003

switching characteristics over recommended operating conditions

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_{PLH} Propagation delay time, low-to-high level output	$R_L = 54 \, \Omega$, $C_L = 50 \, \text{pF}$, See Figure 4	5.5	8	11	ns
t_{PHL} Propagation delay time, high-to-low level output		5.5	8	11	ns
t_r Differential output voltage rise time		3	7.5	11	ns
t_f Differential output voltage fall time		3	7.5	11	ns
$t_{sk(p)}$ Pulse skew $ t_{PLH} - t_{PHL} $			0.6	2	ns
$t_{sk(o)}$ Output skew†				2	
$t_{sk(pp)}$ Part-to-part skew‡				3	ns
t_{PZH} Propagation delay time, high-impedance-to-high-level output	See Figure 5			25	ns
t_{PHZ} Propagation delay time, high-level-output-to-high impedance				25	ns
t_{PZL} Propagation delay time, high-impedance-to-low-level output	See Figure 6			30	ns
t_{PLZ} Propagation delay time, low-level-output-to-high impedance				20	ns

† Output skew ($t_{sk(o)}$) is the magnitude of the time delay difference between the outputs of a single device with all of the inputs connected together.

‡ Part-to-part skew ($t_{sk(pp)}$) is the magnitude of the difference in propagation delay times between any specified terminals of two devices when both devices operate with the same input signals, the same supply voltages, at the same temperature, and have identical packages and test circuits.

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
