- Wide Operating Voltage Range of 2 V to 6 V
- **Outputs Can Drive Up To 10 LSTTL Loads**
- Low Power Consumption, 20-µA Max ICC

SN54HC10...J OR W PACKAGE SN74HC10 . . . D, DB, N, NS, OR PW PACKAGE (TOP VIEW)

- Typical $t_{pd} = 9 \text{ ns}$
- ±4-mA Output Drive at 5 V
- Low Input Current of 1 μ A Max

NC - No internal connection

description/ordering information

The 'HC10 devices contain three independent 3-input NAND gates. They perform the Boolean function $Y = \overline{A \cdot B \cdot C}$ or $Y = \overline{A} + \overline{B} + \overline{C}$ in positive logic.

ORDERING INFORMATION

TA	PACKAGE [†]		ORDERABLE PART NUMBER	TOP-SIDE MARKING
	PDIP – N	Tube of 25	SN74HC10N	SN74HC10N
		Tube of 50	SN74HC10D	
	SOIC - D	Reel of 2500	SN74HC10DR	HC10
		Reel of 250	SN74HC10DT	
-40°C to 85°C	SOP - NS	Reel of 2000	SN74HC10NSR	HC10
	SSOP – DB	Reel of 2000	SN74HC10DBR	HC10
		Tube of 90	SN74HC10PW	
	TSSOP - PW	Reel of 2000	SN74HC10PWR	HC10
		Reel of 250	SN74HC10PWT	
	CDIP – J	Tube of 25	SNJ54HC10J	SNJ54HC10J
-55°C to 125°C	CFP – W	Tube of 150	SNJ54HC10W	SNJ54HC10W
	LCCC – FK	Tube of 55	SNJ54HC10FK	SNJ54HC10FK

[†] Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

FUNCTION TABLE (each gate)

	INPUTS	OUTPUT	
Α	В	С	Y
Н	Н	Н	L
L	X	Χ	Н
Х	L	Χ	Н
Х	X	L	Н

logic diagram (positive logic)

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)†

Supply voltage range, V_{CC}	D package	±20 mA ±20 mA ±25 mA ±50 mA 86°C/W
	DB package	
	NS package	
	PW package	113°C/W
Storage temperature range, T _{stg}		-65°C to 150°C

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. The input and output voltage ratings may be exceeded if the input and output current ratings are observed.

2. The package thermal impedance is calculated in accordance with JESD 51-7.

recommended operating conditions (see Note 3)

			SN54HC10)	SN74HC10			
			MIN	NOM	MAX	MIN	NOM	MAX	UNIT
VCC	Supply voltage		2	5	6	2	5	6	V
		V _{CC} = 2 V	1.5			1.5

PARAMETER MEASUREMENT INFORMATION **From Output** Test Input 50% 50% **Under Test Point** $C_L = 50 pF$ ^tPHL tPLH -(see Note A) ۷он In-Phase 50% 10% Output **LOAD CIRCUIT** - tPHL VCC 90% Input 90% **Out-of-Phase** Output 10% **VOLTAGE WAVEFORM VOLTAGE WAVEFORMS INPUT RISE AND FALL TIMES** PROPAGATION DELAY AND OUTPUT TRANSITION TIMES

- NOTES: A. C_L includes probe and test-fixture capacitance.
 - B. Phase relationships between waveforms were chosen arbitrarily. All input pulses are supplied by generators having the following characteristics: PRR \leq 1 MHz, Z_O = 50 Ω , t_f = 6 ns, t_f = 6 ns.
 - C. The outputs are measured one at a time with one input transition per measurement.
 - D. tplH and tpHL are the same as tpd.

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS) or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
